A glass door under-counter bar fridge designed to merchandise ready-to-serve cold beverages in bars, restaurants, clubs, pubs, and cafés. Engineered to serve cold drinks at 1°C to 4°C (or adjustable up to 15°C) in ambient environments of up to 32°C. Made from powder-coated, galvanised steel with colour options, it can also be upgraded to full stainless-steel construction. The glass doors are designed for condensation protection in most environments via the double-glazed, argon-filled low-e insulated panels and heated fascia. Sliding door locks are optional. The built-in LED lights provide optimum merchandising and can be dimmed or timed to turn on and off via a free smartphone app. The fridge uses R290 natural refrigerant for ultra-low energy consumption, low heat discharge and low noise output and can be provided in remote versions. The side-mounted fully removable refrigeration cartridge (with left and right options) is front-breathing and can be removed in line with best practice for safe servicing of flammable refrigerants. The fridge includes a controller that connects to a free app to enable the user to set temperatures and alerts, monitor temperatures and energy, and more. The fridge is certified to all Australian and New Zealand refrigeration and electrical safety standards.
