## go green

### Future-proof your business with ActiveCore 2

The world is changing fast, and that includes the hoops food service businesses like yours have to jump through to stay open and penalty-free.

You don't have time to worry about that right? Of course not, that's why ActiveCore 2 uses a natural refrigerant called R290 that ticks all the environmental boxes.

## SKOPE-connect™

### Puts you in control of your ActiveCore 2 fridge

SKOPE-connect is a new app that puts the power in your hands so you can monitor and control the fridge from your smartphone.

Now you can easily maximise the performance and efficiency of your fridge to help manage the profitability of your business.

**SKOPE-connect™**  
puts you in control

**Connect and Control via Bluetooth™**  
Individual & multiple ActiveCore 2 fridges across venues.

**Review the History**  
24 hour quick view summary or up to 5 months of graphical information for fridge temperature, energy use and door openings.

**Know the Energy Use**  
Drill down into energy consumption by day, week, or month in both kWh and \$ value.

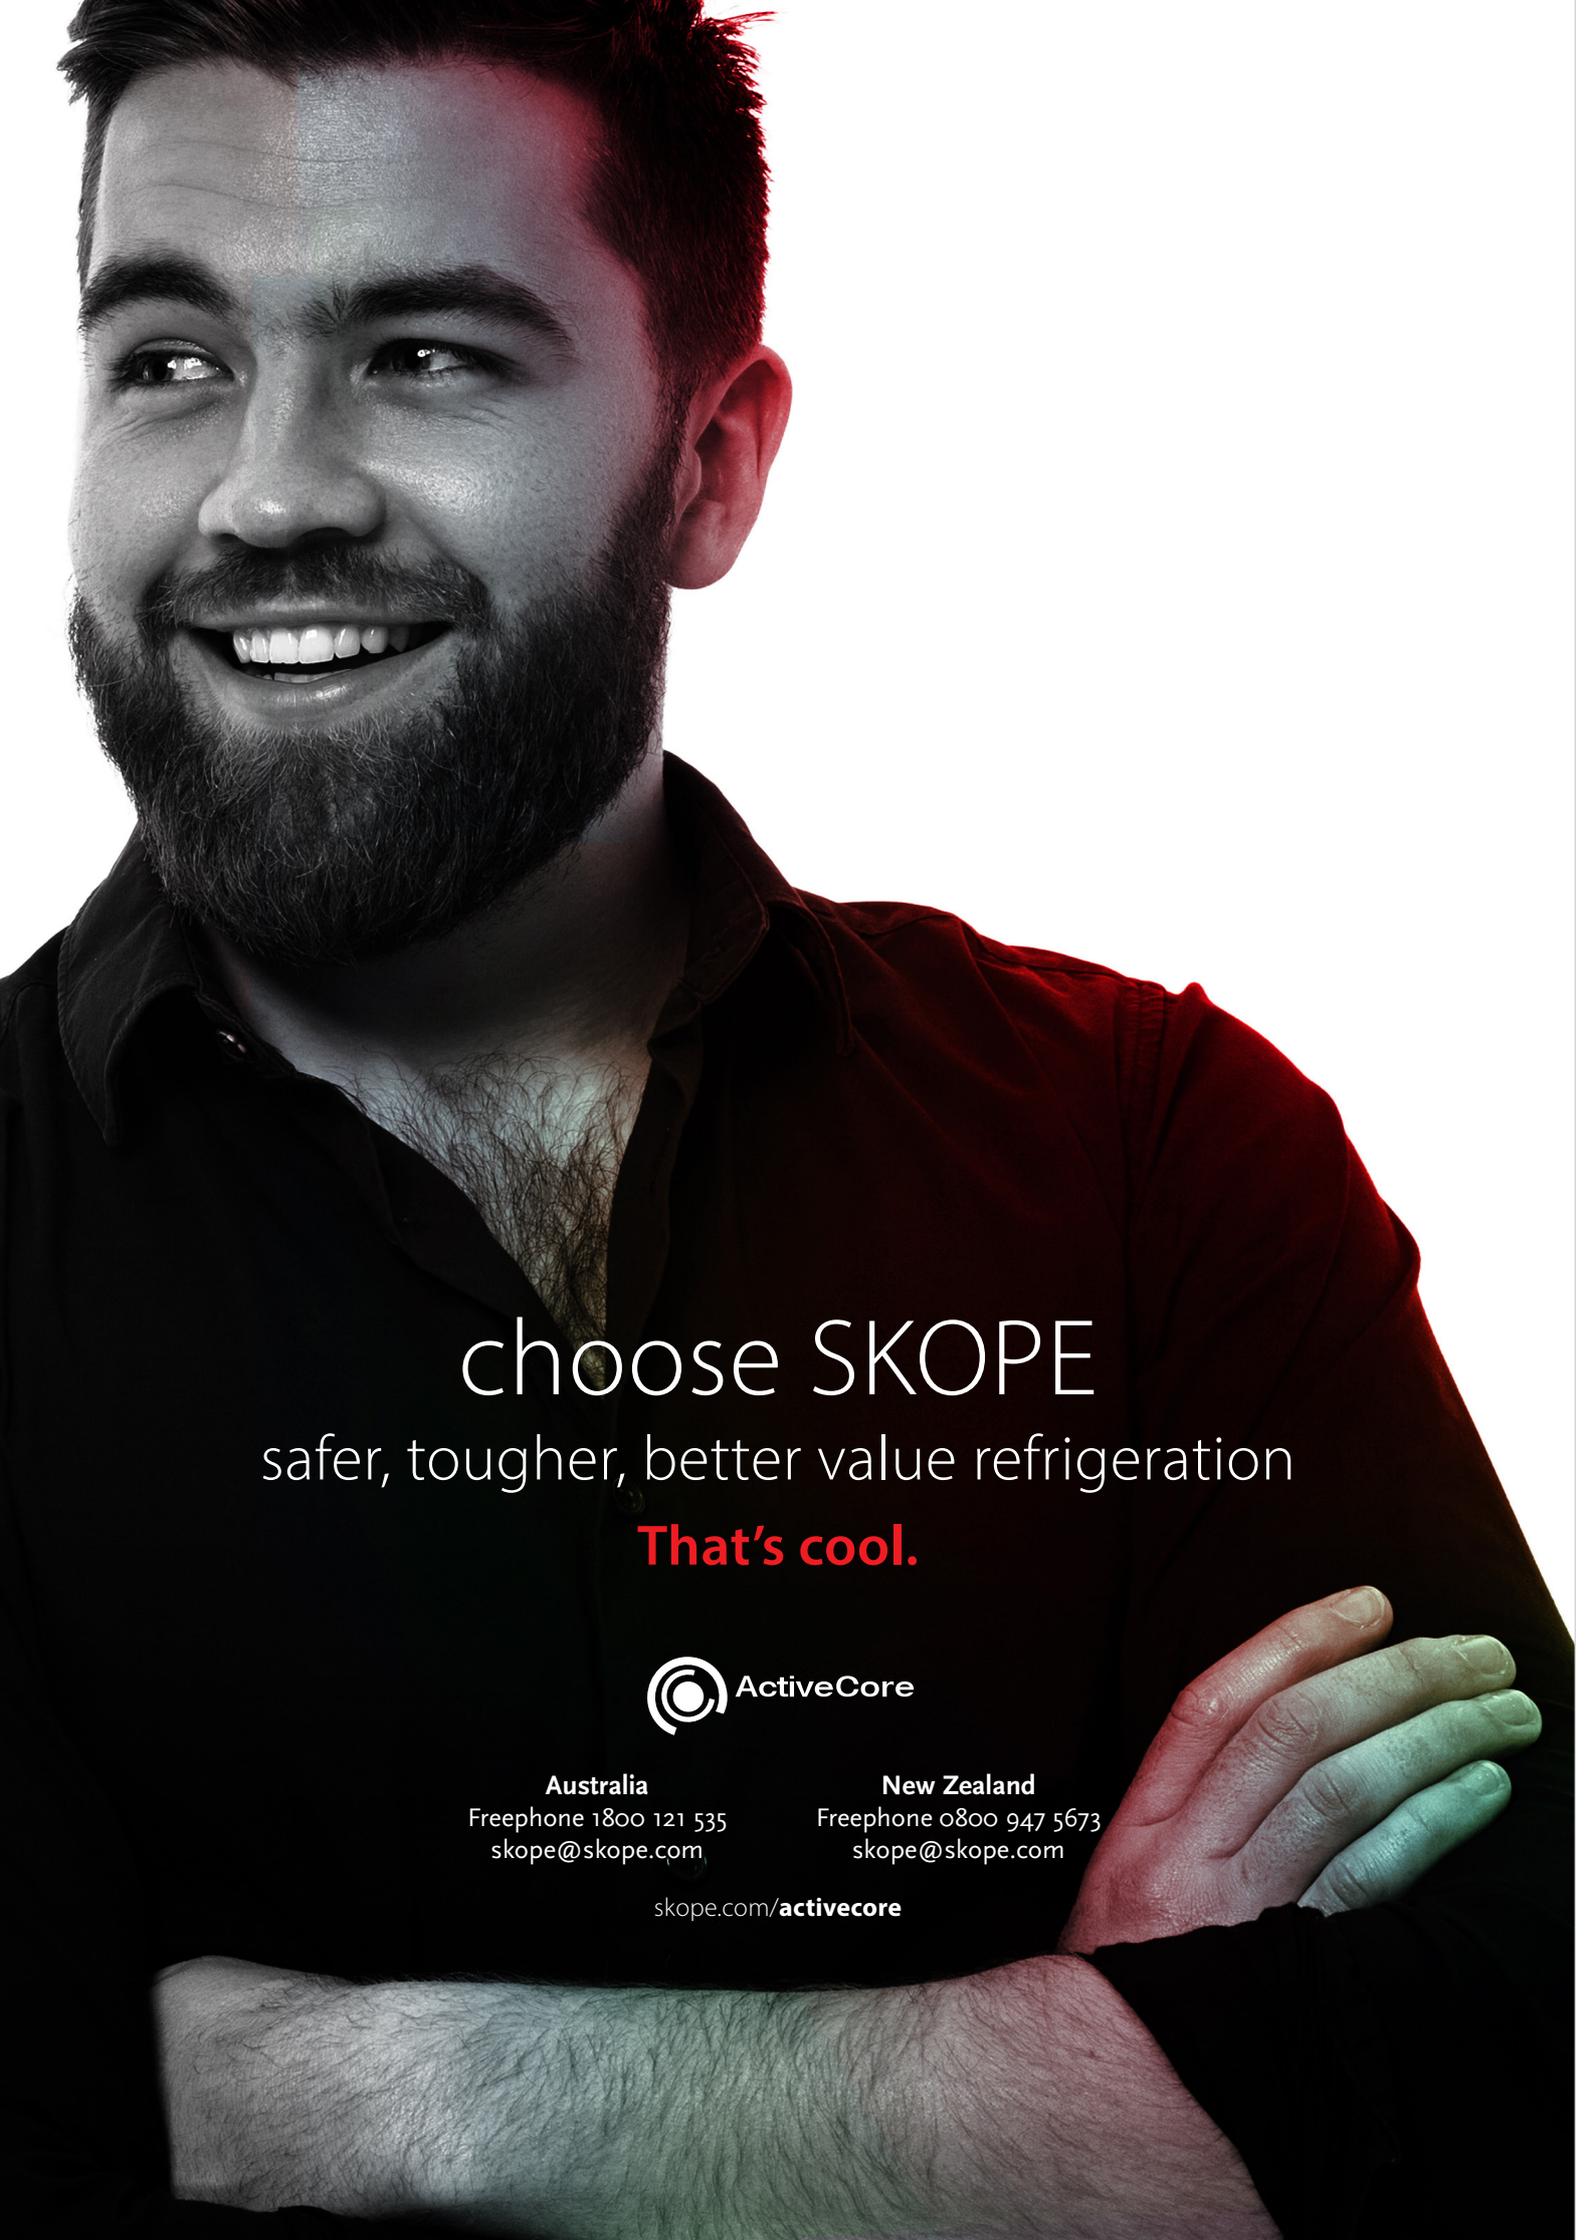

**Set the Product Temperature**  
Quick select setting of fridge temperature based on the product inside; 7 pre-set product types and manual control.

**HACCP- Monitor & Export**  
Display and export fridge temperature data and raise an alert if the temperature exceeds the limits you set.

**Control the Lighting**  
Basic on/off control or set on a more advanced activity basis such as door openings or store- venue opening and closing hours.

**Make it Quieter**  
One touch Hush Mode quiets the fridge making it ideal for customer service areas.

**Comprehensive Alarms**  
Provides a description of the fridge fault and the recommended action to rectify it.

choose SKOPE  
safer, tougher, better value refrigeration
