

SKOPE®

**Bar
Refrigeration**

Adaptive design

Choose your size, colour,
dimensions and cabinet features
to suit your bar design.

Choose SKOPE

Flexible, bar refrigeration systems from SKOPE

What works for you?

With SKOPE's Adaptive design customers get greater flexibility when it comes to integrating refrigeration into the overall design specifications of the bar or establishment.

Create your own unique look

Personalise your fridge to reflect your individual aesthetics and create the right mood

- A range of door colours including black, white and stainless or choose almost any Dulux powder coated colour to match your surroundings
- Specify the design of your doors to match your requirements with a choice of solid, glass or pass-through
- Change your countertop, add some lighting or simply alter the configuration to make our cabinets work for you.

Flexible options to suit your space

Our creative options give you greater flexibility when designing your space

- Choose a standard floor model, or one which is wall mounted
- Choose from self-closing swing or sliding doors
- Select from left or right hand service options, or use a combination of both
- Vary the dimension of your unit to fit perfectly into your space.

Maximise product presentation

Display your product in the best way possible, to boost sales and increase revenue

- Use LED lighting options to create mood and eye-catching displays
- Select glass doors to maximise product display, or solid doors for storage convenience.

Improve storage capacity

Configure your unit to maximise its storage capacity, improve your footprint and create a better workflow

- Specify your internal and external cabinet dimensions to maximise your available space
- Choose from integral or remote refrigeration options
- Alter your shelving to cater for better stock management

Enjoy ongoing reliability and efficiency

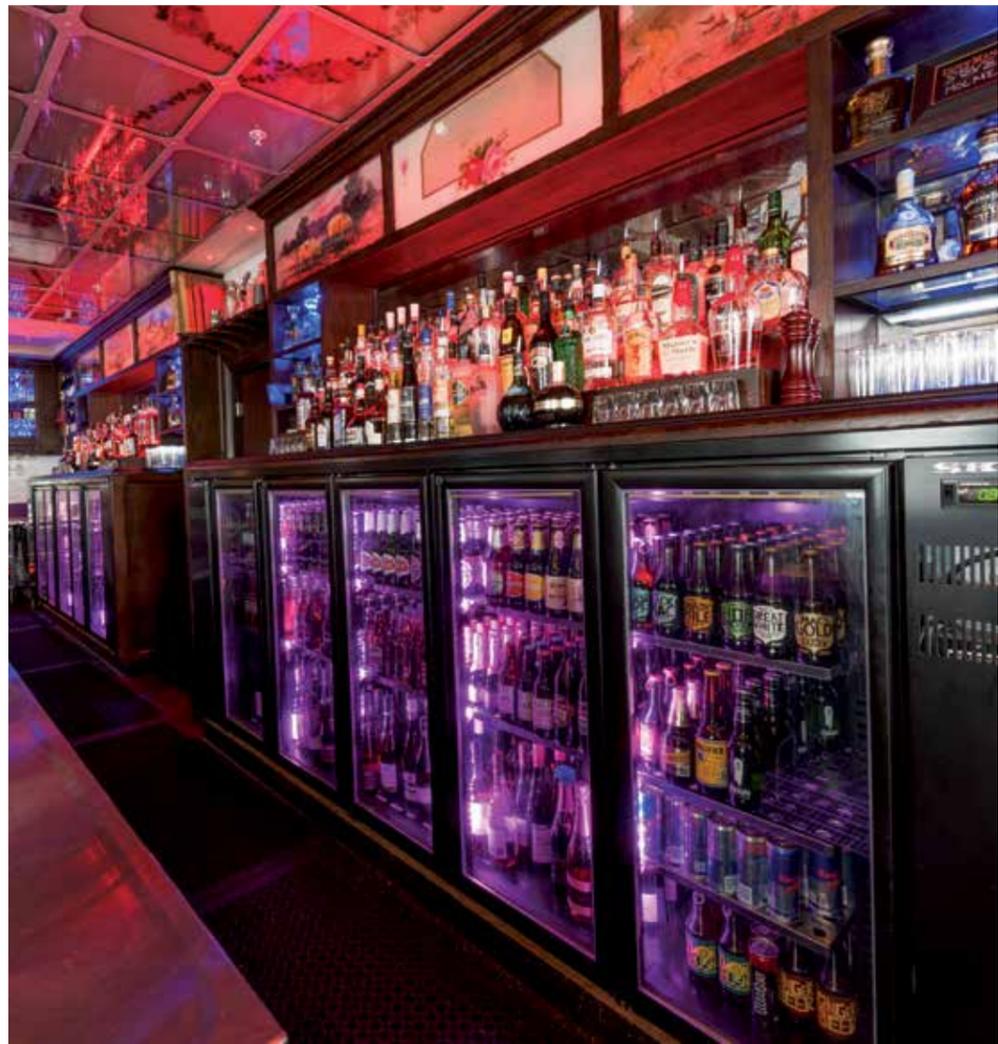

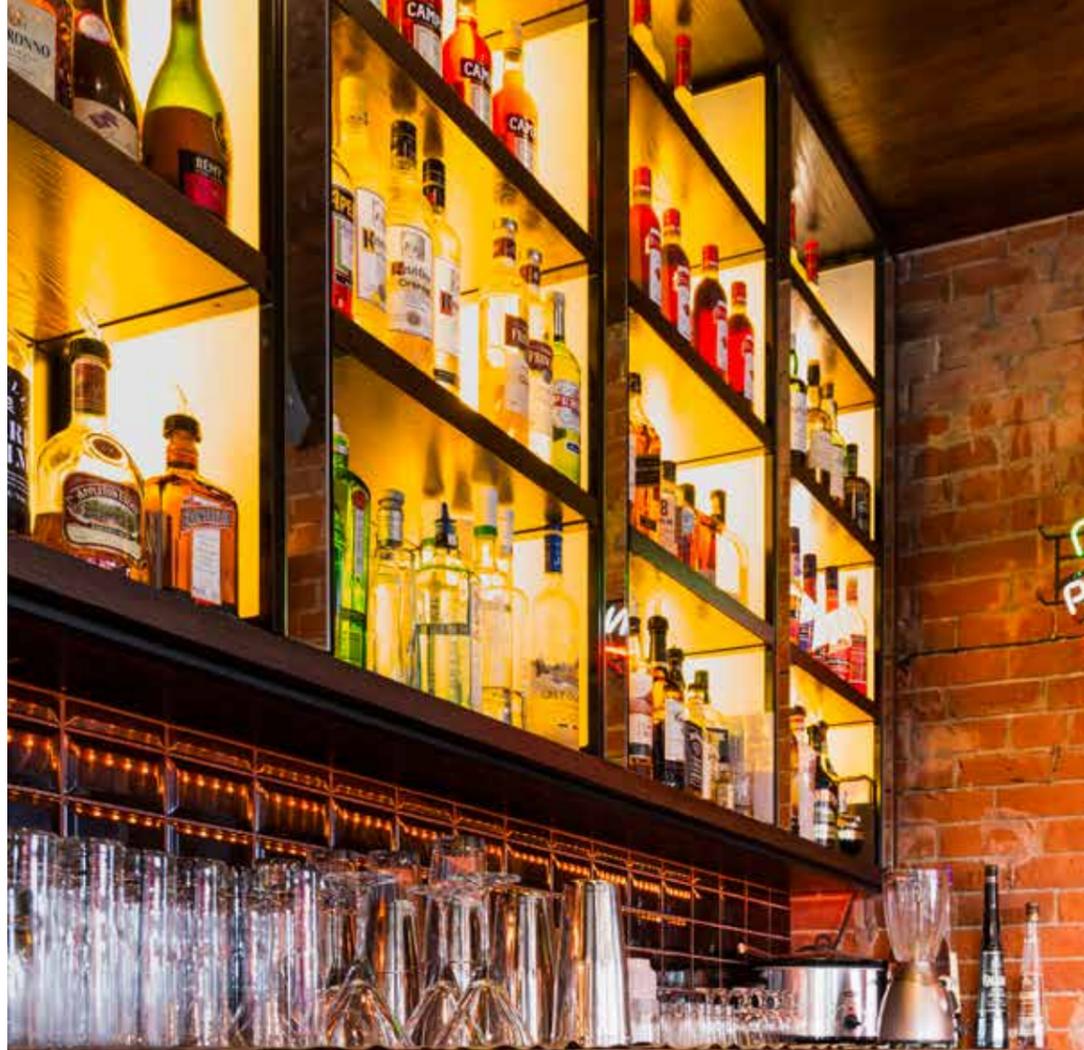

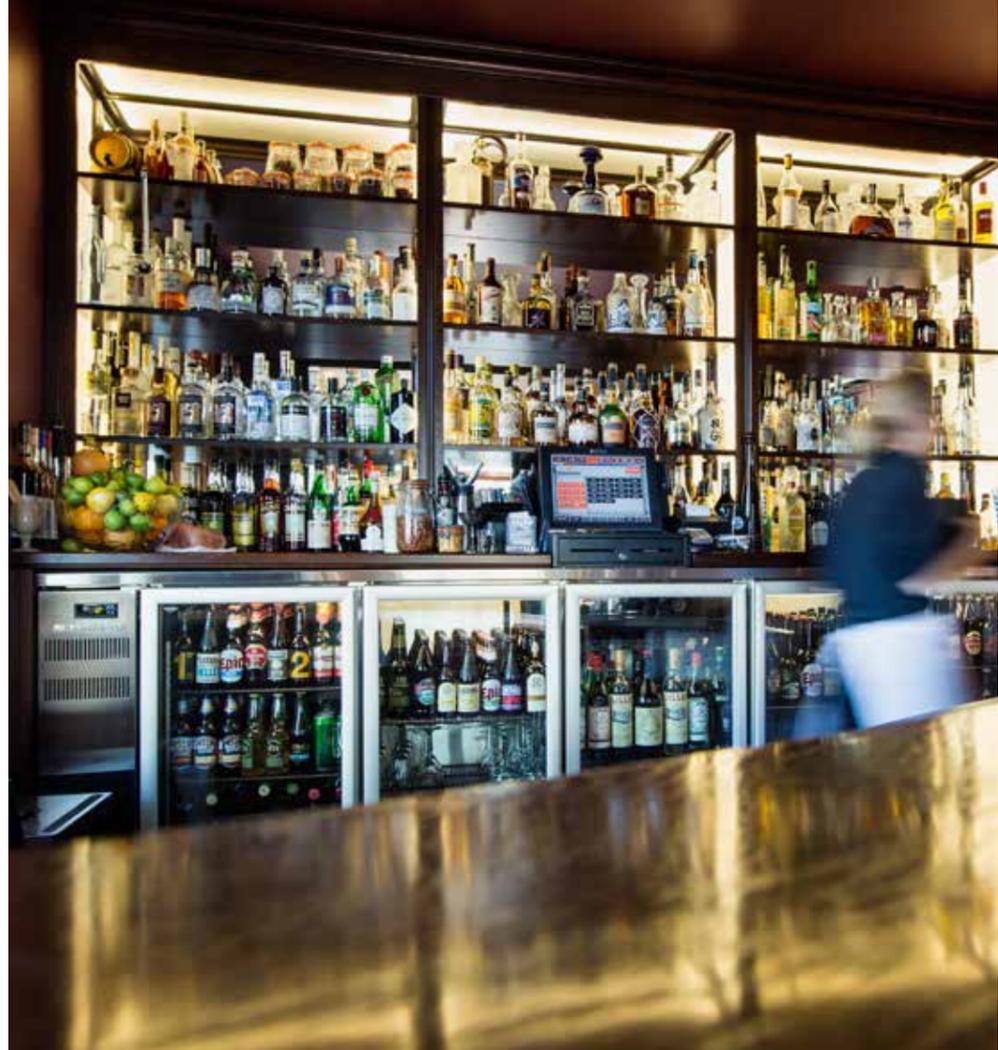

Backed by SKOPE's reputation for quality and reliability, which minimises the risk of downtime

- Hardwearing, durable finishes so your cabinets look better for longer
- Engineering excellence assists with reduced noise
- Heated glass options available to eliminate condensation (ideal for high ambient conditions)
- Low emission argon glass options help with extra thermal performance and energy savings

Bar Refrigeration

Adaptive design

Why you can depend on us for the best in commercial refrigeration.

- SKOPE is a family owned company with an international reputation for innovative design and manufacturing
- SKOPE is the refrigeration brand of choice and a market leader in the industry
- Trusted by customers since 1965
- Raising standards in design and performance, while lowering environmental impact, are key to our future and core design principles
- We keep at the forefront of technology advances in all fields of refrigeration development, including energy efficiency and componentry
- Our specialised team will adapt any product to suit your exact specifications
- We have collaborated on some inspiring and innovative projects from new restaurants, bars and commercial spaces to provide the best in commercial refrigeration
- High energy efficiency models available
- All SKOPE products are backed with superior warranty protection and after sales support

Adapt
to your
surroundings

Choose what works for you

Adaptive design
